

CFS Joinery Specialist

Staircase Brochure

We specialise in the manufacture of Stairs and Staircases

Our attention to detail, combined with the high quality Craftsmanship in both hardwood and softwood ensures we produce the best possible finished products.

Complete Service

As UK based staircase manufacturers, we aim to provide a complete service we supply a wide range of clients from, the construction industry to private sector, whether this is for commercial applications or for self build, home renovation and extensions, using quality materials like mahogany, oak, hemlock beech and pine for our products.

We will undertake site surveys and can offer purpose made staircases in as little as 10 days.

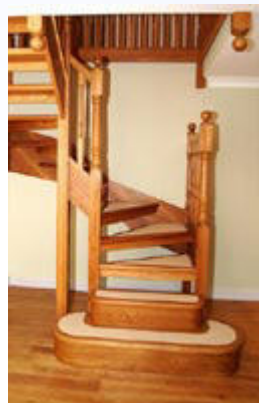

Fax or e/mail your drawing and we will return our quote within 24 hours.

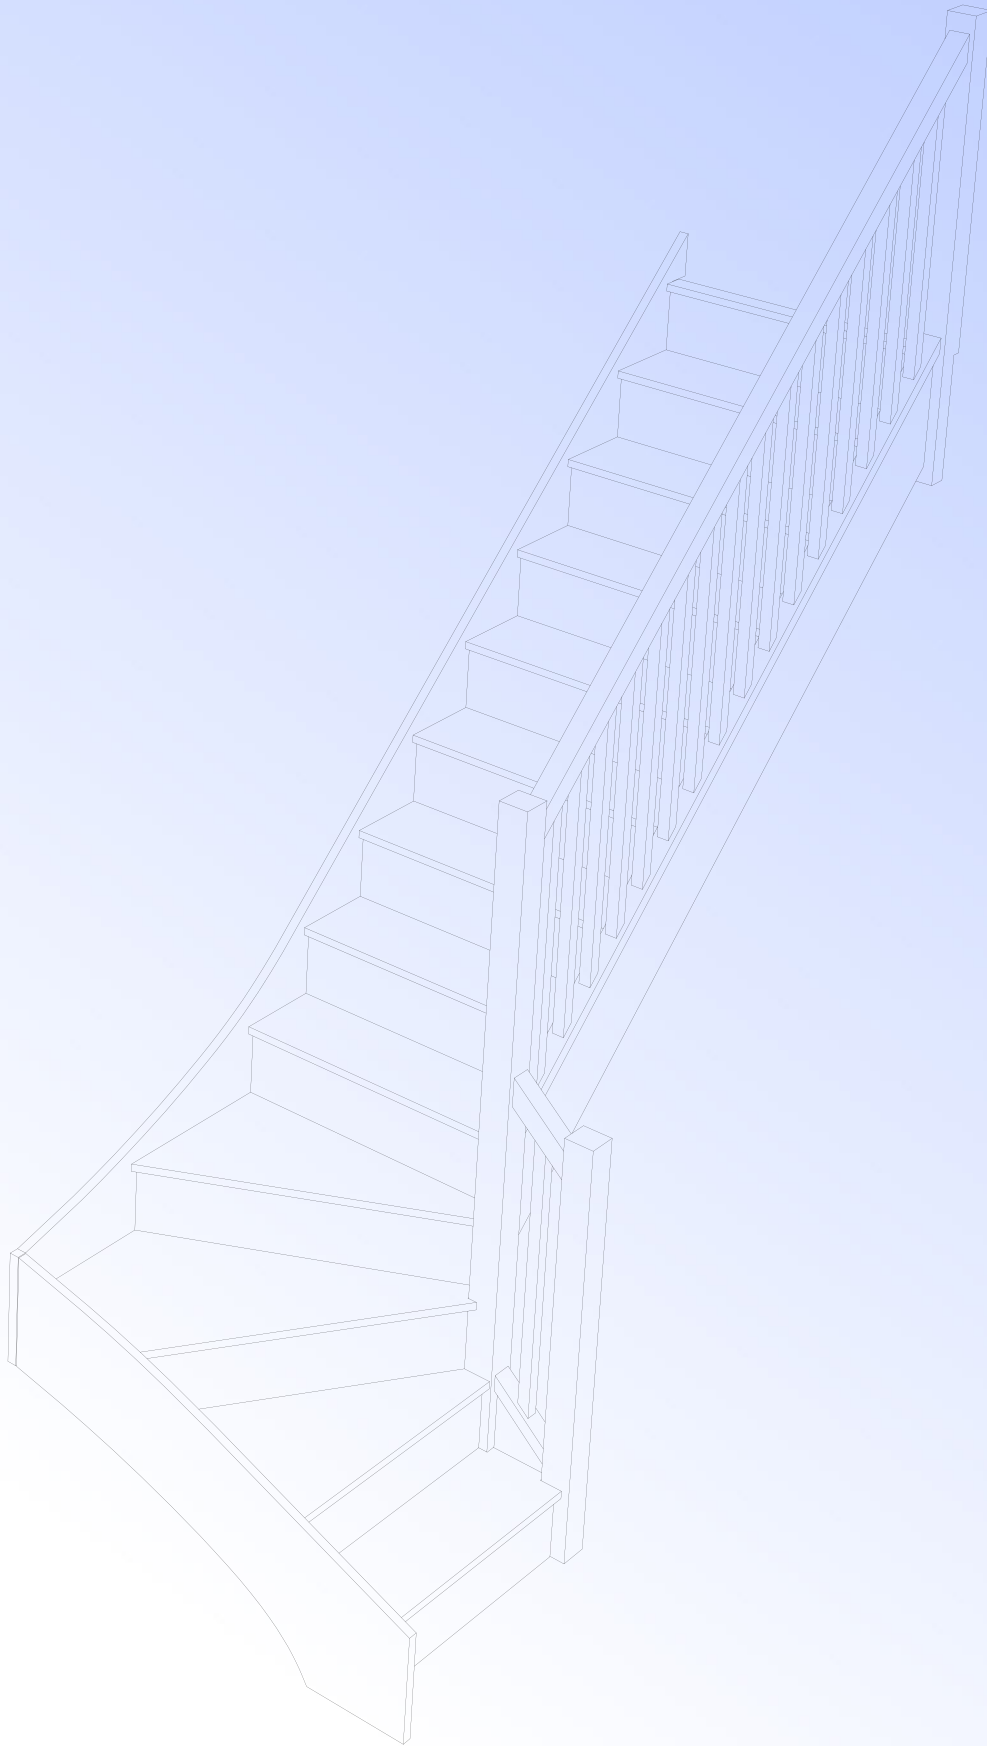

Using our bespoke computerised design software ensures your staircase will meet building regulations, detailed printed drawings can be provided on placing your order.

If you are restricted for space such as a loft conversion we can also manufacture a Paddle Staircase.

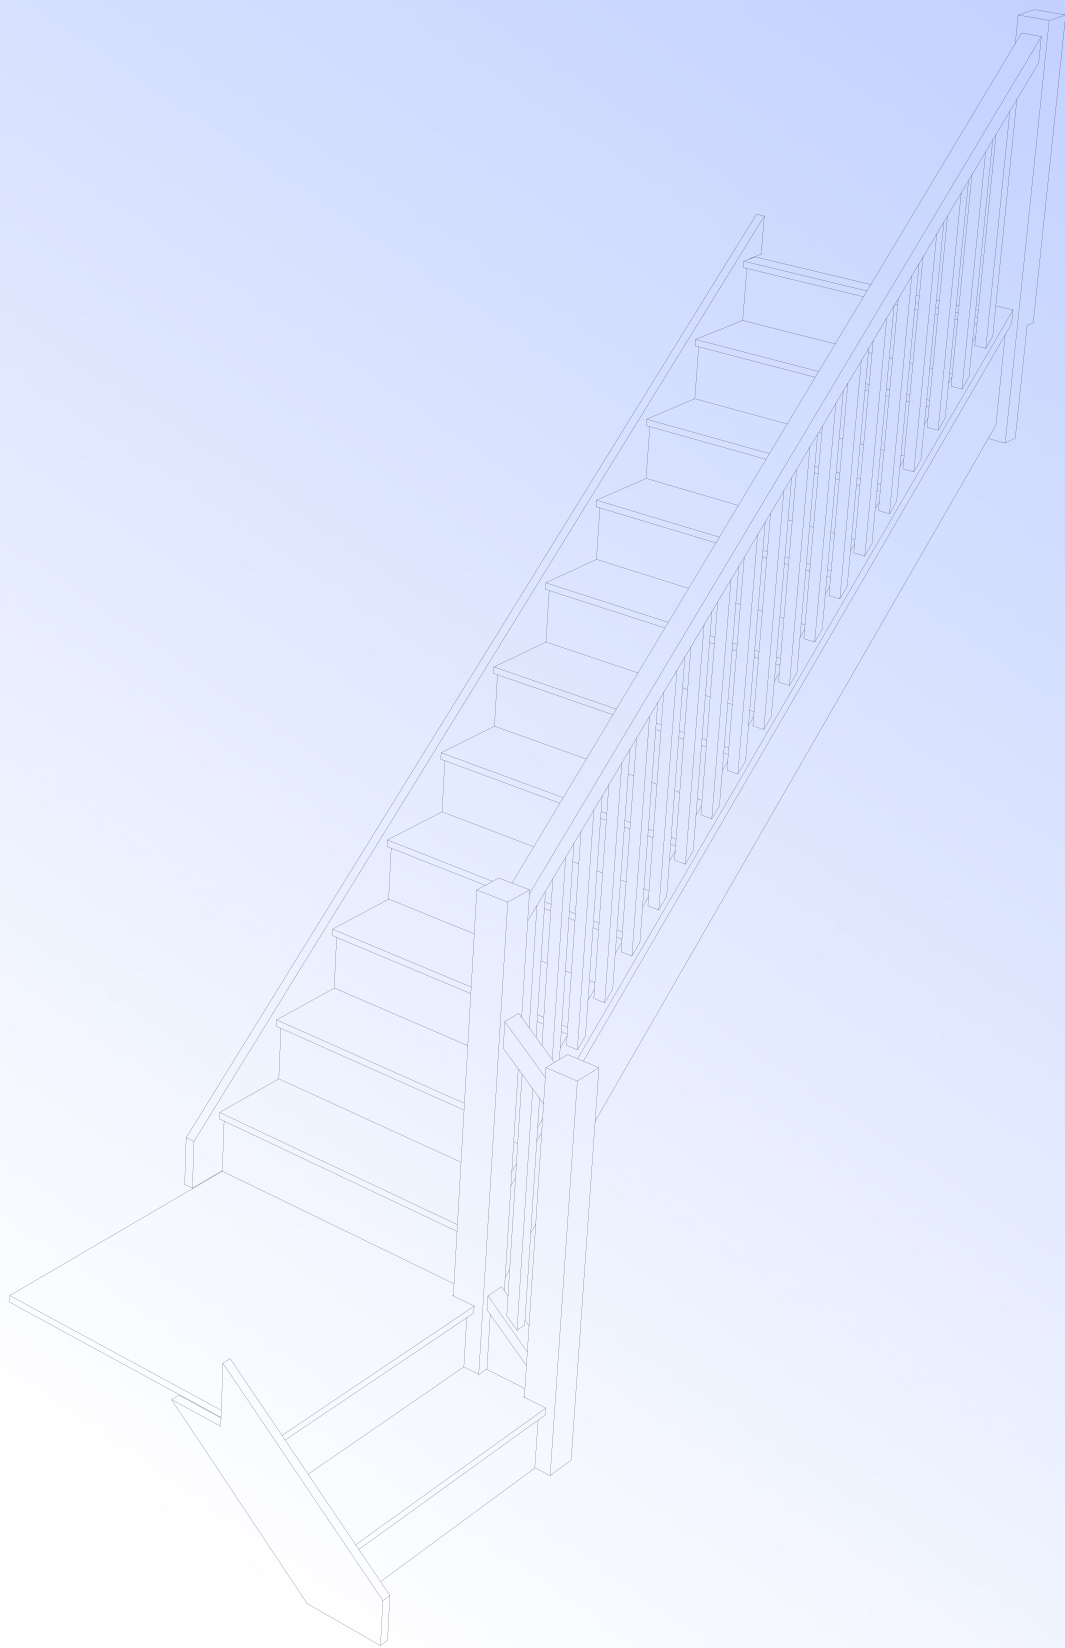

Balustrading

In various styles EG; - Colonial and Georgian handrails, spindles, newel posts, Caps
EG; - Round Ball, Acorn, Mushroom, Burger, Fluked Barley Twist.

We manufacture Staircases in the following timbers,

Pine is a slow grown Scandinavian timber, an economical timber suitable for staining and painting. All knots in the timber are sound.

Southern Yellow Pine has distinctive character in both colour and grain. Although generally clear, a limited number of small knots are permitted. Grown in the Southern United States, it enjoys the reputation of being exceptionally strong and has a high resistance to wear. Whilst relatively easy to work this wood is comparable to hardwood species such as Oak for strength.

Mahogany/Sapele is a West African hardwood, with a reddish brown colouring, typical of Mahogany. This fairly close textured timber is harder and heavier than both American and South American Mahogany. As with any product, variation in colour is to be expected.

Oak American White. A strong, heavy hardwood grown in the Eastern half of the United States. Due to the high costs of large sections, newel posts and handrails are laminated, careful attention being paid to grain matching.

Ash American White. A quality American hardwood, Ash can be stained and polished to a very good finish

Please provide the following measurements, and what material you would like us to quote you for, eg; - Softwood or Hardwood.

The Length, Width and Height.

Please note the following,

The Length should be where you want your staircase to start from allowing for room to walk into the stairs,

The Width should not be less than 750mm (This is the acceptable minimum although they can be made narrower).

The Height should be from the Ground Floor to the Top of the Upstairs Joist including the Floor Board

The price put forward will be estimated and would be dependant on a site survey if sizes are approximate.

Please remember the more information you provide the more accurate our price will be.

If you have any detailed drawing that you would like to forward to us these can be sent by fax (0121 313 0448) or as an attachment by e/mail to cfsjoinery@supanet.com

**Select the closest style staircase to what you require then either phone us
on 0121 384 8707 or fax us on 0121 377 7331
or e/mail us at cfsjoinery@supanet.com for a quotation**
